3rd INTERNATIONAL FLORENCE SYMPOSIUM

FROM GENES TO TARGET THERAPY IN HEMATOLOGY

Edition 2025

Introduction

Hematology is a continuously changing discipline virtuously standing half the way between the bench and the bed. It is continuously informed by advancements in genetics and pathophysiology that, at a sometimes incredible pace, translated into diagnostic, prognostic and therapeutic benefits for the patients. The third edition of the Florence Symposium “From genes to targeted therapy in hematology” will host international KOL presenting the latest news in oncologic and non-oncologic hematologic diseases with the aim to boost knowledge and interactions among participants.
